

# Andrew Chun

## Software Engineer

Atlanta, GA

### EXPERIENCE

#### General Assembly, Boston, MA (Remote) *Software Engineering Immersive*

May 2020 - August 2020

Completed a 12-week, 500+ hour full-time career accelerator on full-stack web development. Trained in industry-best practices for creating full-stack web applications using agile/scrum development. Built RESTful APIs and integrated data from third party APIs using Git/Github for version control. Web development projects include:

##### Hype-Board

-A full-stack message board application built using React on the frontend with Django and a PostgreSQL database on the backend. Authenticated users are able to CRUD posts and comments on the forum.

##### Golf ScoreKeeper

-A full-stack application for keeping track of rounds of golf, built using JavaScript, jQuery, Handlebars.js, Bootstrap, Express.js, MongoDB. -Incorporates a third party API to display weather information by city.

##### PlusOne (Group Project)

-A full-stack social event application where users can CRUD events and make RSVPs. This application was built using a React framework with Express/MongoDB on the backend. This group project was created along with 3 other developers.

##### Tic-Tac-Toe

-A front-end JavaScript Tic-Tac-Toe application (including game logic) built using jQuery, HTML, and CSS.

### EDUCATION

#### Udacity, Remote *Predictive Analytics for Business Nanodegree*

August 2019 - July 2019

#### Duke University, Durham, NC *B.S. in Economics with Finance concentration*

August 2014 - December 2018
